Continuum of Pedagogical Strategies for Play-Based Learning

Child-Directed ——— Educator Guided ——— Educator Directed

Adapted from Pyle and Danniels, 2017

Full Day Programming?

Over the years we have had many parent inquiries about a full day program. Until recently, we did not have long term research to support the idea that full day programming was better for students. Since the implementation of mandatory and funded full day programming in BC and Ontario, the research is strong. Full day, play based learning, utilizing the full continuum is best for students. Students will access learning activities in a holistic and complete way. We are thrilled to include Kindergarten students in all we do at St. Augustine School.
